## Career Objective:

With over 3 years of experience in the software industry, I am a web application developer. I have hands-on experience building several web application products and have solid experience in web application development. I enjoy collaborating with cross-functional teams, learning new skills, and solving challenging problems. My career aspiration is to transition being a Software Engineer with my still experiences and domain knowledge.

## Working Experience

### Tech Myanmar Co.ltd

March 2020 – January 2024

Position: Web Developer (Backend Developer)

- Using the Figma application, integrated web applications with the help of UI/UX designers.
- Maintained and continuously improved web application for services and developed new features and admin panel for E-commerce web application.
- Improved workflow systems to enhance efficiency across sales and operation teams.
- Worked on integrating different plugins and gems. Optimized performance of long running jobs by using multi-threaded background jobs.
- Integration of cloud data storage services using Cloudinary and AWS Cloud for cloud storage.
- Worked with team members effectively to identify and resolve technical issues.
- Created and maintained reusable codes for future development processes.
- Identified and resolved errors in the current system and improved the code splitting and image optimization.
